## DEPARTMENT OF MUSIC

### **iPads, Teens, and a College Music Methods Class: What's the App for That?**

By Gena R. Greher & Savannah Marshall

#### **iPad Scavenger Hunt**

As a team, please complete the following tasks in order, to the best of your ability. If you have any questions or get stuck, raise your hand and a teacher will come over to help you. This is a team activity, and everyone should contribute equally - so share! :)

---

1. Create a team name. Write it in any drawing app, making sure each member adds to it. Take a screen shot (Home + Sleep buttons together at once) and set the picture as the iPad wallpaper.
2. Explore the apps and find one which best creates a loop. Save your loop and write the app you used here:
3. Find an app that allows all members of the group to make music at the same time. What app did you pick?:
4. Find an app where you can create a beat that would sound good being rapped over. Create the beat, save it, and write the app name here:
5. Find a sound on the iPad or in the classroom that is not normally considered musical, and make it musical. If the sound is in the classroom, record the sound into the iPad, and save as your team name.
6. Find an app that makes you feel like you're in another country. Which country are you in? What app did you use?
7. Find an app that makes you feel like you're dreaming. What is your dream about? What app did you use?
